2nd Symposium by the Austrian Ministry for Environment

on

National systems or practices in place according to Art. 16/1 for authorising/registering of BP in certain Member States and their interaction with the main authorisation/registration procedures according to Art. 3 to 8 of the BPD (EC/98/8)

When: May 19th to 20th, 2011

Where: Vienna, Austria

Why : Art 5 of the BPD (98/8/EC) lays down the procedure for the main authorisation and registration of a biocidal product. Art 16/1 provides that member states, who have a system or practice in place for the marketing of biocidal products at the time directive 98/8/EC came into force, can prolong this system until the review of the active substances has been completed (2014).

Only 3 Member states have only minor or no extra regulation at all. Most member states cover the full range of product types as listed in the BPD and the others only cover a part or have exceptions in certain product type categories.

This situation is source for a variety of misunderstandings and marketing problems for companies and also requires a lot of resources of the national CAs. And the situation has become even more complex since the first Annex I /IA inclusion of 98/8/EC decisions have been taken and first authorisations according to Art 3 to 8 of the BPD have been granted in Member States. Furthermore there is a strong interaction of these decisions with national procedures. Therefore, it is essential that all parties involved - especially the CAs - explain their national systems or practices in place and share their experiences and broadly discuss their findings with experts of other Competent Authorities and other stakeholders.

What: This 2 day Symposium will systematically focus on the details of existing national systems or practises for marketing biocidal products in certain member states. The details of these national requirements as well as the experiences gained so far will be presented mainly by national Competent Authorities also focusing on the interaction with the main authorisation/ registration procedures according to Art. 3 to 8 of the BPD (98/8/EC).

***) Key issues addressed are:** ► overall national system in place and range of product types covered ► the different applications according to the national scheme and submission requirements (format, content etc) ► language and labelling requirements according to the national scheme ► duration of procedures, time to market, data requirements and exemptions according to the national scheme ► national consequences of an Annex I/IA inclusion or non-inclusion decisions on the basis of the BPD for existing “national” authorisation like e.g. remaining time to apply for national authorisation or changes to existing national authorisations in regard to the date of inclusion of active substances in Annex I/IA of the BPD or withdrawal periods (for e.g. sale of existing stocks) ► national consequences of first authorisations or mutual recognitions on the basis of the BPD for existing “national” authorisations ► experiences, other obstacles, current situation and outlook, interactions with the main authorisation/ registration procedures according to Art. 3 to 8 of the BPD (98/8/EC) existing guidance, etc...

Who: Representatives of national Competent Authorities as well as involved Stakeholders (producers, retailers, formulators, consultants, etc.) dealing with these issues.

Attention: ► Language of the Symposium is English only!
► Only a limited number of participants is possible; so please register early!
► There will be no handouts distributed at the Symposium, but all documents will be made digitally available!

Symposium by the Austrian Ministry of Environment

May 19th and 20th, 2011

Thursday, May 19th, 2011

08:00-09:00	Check In and Coffee/Tea	
09:00-12:30	Part 1	Chair: Dr. Edmund Plattner BMLFUW, Austria
5'	Welcome	
30'	Intro and issues – the overall situation and the specific problems with regard to national systems or practices in place in certain member states, the interaction of these schemes with the EU system and the transition process from the national schemes to the EU system	Dr. Dave Dillon SC Johnson, UK
